Hi Jim-

I have received two calls recently.

The caller I mentioned at the BCT is (b) (6) - he is a Navy veteran in North Carolina (I am assuming he is retired). His number is (b) (6). Based on my conversation with him, he was happy for me to forward his information to you and welcomes a call, but he will not call the Navy. He has some health issues (had open heart surgery, is diabetic) that he believes are related to a ten-day training exercise at Treasure Island. The visit was a four-day fire-fighting exercise and a four-day drainage control training in March 1976. He left the training with an illness that was reported and is on file. I am not sure about the nature of the illness. I think he was stationed in Guam after leaving TI.

He asked me specifically about the use of agent orange on the base and thinks it may have been sprayed there. He remembers seeing barrels with orange and purple rings (black barrels w/ purple or black barrels w/ orange rings). He referred specifically to Building 520 and parcel T120.

The second caller, Dr. E.D. Bishop, was looking at former military housing as an opportunity to house convicted sex offenders. She has called a lot of people at EPA and may have called you (she asked me for your number). I explained to her that, in my experience, most military housing on closed bases has been transferred and is operated like other rental units. She seemed to understand that we work on the site cleanup side rather than the development side.

Let me know if you have any questions.

Subject: PUBLIC INQUIRY RE: TREASURE ISLAND

Christine,

Was there a public inquiry received at EPA regarding TI that you were going to pass to me, or did you pass on my name and number to the inquirer?

I had a voicemail from what seemed to be a public member and I wondered if the two inquiries were connected.

Thanks,
Jim
